DIGITAL COPYING SYSTEM

CD 1182

THERE'S STRENGTH IN NUMBERS.

The CD 1182 digital copying system, which also offers optional printing and scanning, cannot get enough when it comes to both maximum productivity and visually perfect output quality. With an impressive 82 A4 and 41 A3 pages per minute, it completes jobs of every size with incredible speed and is just as at home as a central departmental unit as it is in an in-house reproduction department or copy shop. Thanks to its standard duplex unit and document feeder with duplex scan function, which processes up to 110 images per minute, it is in its element whatever the situation. The possibilities are endless with paper formats from A3 to A6R, paper weights of up to 200 g/m² single sided and up to 160 g/m² in the duplex mode. Professional output is achievable with an optional staple finisher, which additionally punches holes and provides a folding module for up to 64-page brochures.

The high level of performance of the CD 1182 is supplied by a 128 MB memory and a 40 GB hard disk, which are supported during the optional printing function with a 600 MHz processor, separate printer hard disk and network card. In terms of paper supply, this digital copying system has much to offer: With a standard capacity of 4,100 pages, which can be extended to 8,100 pages, high-volume output is no problem at all. Yet, everything remains uncomplicated and convenient during operation – thanks to an adjustable touch screen with intuitive instructions, the ability to program multi-page jobs and an optional intelligent finisher with 3,000-sheet capacity. In addition, the CD 1182 provides up to 1,000 management codes for absolute cost transparency and simple administration, and all of these perfectly functioning features are protected with the optional Data Security Kit for overwriting of hard disk data.

THE MARK OF A PROFESSIONAL:

- Top speed of 82 A4 pages and 41 A3 pages per minute
